## Rainbow Ford Dealership

We are at the construction start-up stage for a major renovation/expansion of the Rainbow Ford dealership in Rocky Mountain House. This is a Design Build Project with Camdon Construction. This project will see the addition of 20,000 sq. ft. in three phases and will include a showroom, office space, parts department, and shop/service area. The showroom and office spaces will be conventional construction and the parts department and shop/service area will be pre-engineered. Berry Architecture has completed structural and architectural components. We are really enjoying working with Camdon and being a part of the Design Build process.

## Berry Architecture Wellness Ride Success

The 4<sup>th</sup> annual Berry Architecture Wellness Ride took place on August 25, and we were thrilled with its success. We raised over \$30,000 for the Canadian Mental Health Association and Central Alberta Brain Injury Society. Thirty-three participants took part in the ride and, hopefully, had a great time in spite of a wicked headwind on the second leg of the ride. We had lots of volunteers from CMHA, CABIS, Berry Architecture, and Wipe Out Ski & Bike. Thanks to all our sponsors who provided food, prizes, support vehicles, goody bags, etc. A special thank you to Adam George (celebrity rider) and Mayor Flewelling for their support and encouragement. And, of course, thanks to everyone who made donations to these two great organizations. We look forward to seeing our cyclists and volunteers next year. [Photos](#)

## Journey-Themed Design for Word of Life

We are excited to announce the start-up of a really fun project for the Word of Life Church. This project will be an expansion of the facility to create a new youth and children's wing. The expansion will take place in three phases. The first phase is a new auditorium for 250 children; it will include a large performance/worship space with a stage and auditorium seating. The subsequent phases will include classrooms and an adventure space. The journey-themed design will feature a life-size plane in the large adventure space and many other travel-related design features. The project is currently in the selection process for a Construction Manager.
