### ***Bashaw Meadows Supportive Living Lodge Project Update***

Bashaw Meadows Lodge is a hive of activity with construction moving along rapidly. The exterior work has been completed and provides a very attractive and inviting façade. We'll have professional photos to share in the spring! The lovely and comfortable show suite has been completed as well. The interior work is well underway with all trades working towards the finish deadline of May 2013. We have really enjoyed the great team atmosphere between Bethany Group, Krawford Construction, and Berry Architecture. It's been a super experience working together, and it's shaping up to be a project we will all be proud of for many years to come.
