

Merry Christmas

Courtesy of Berry Architecture + Associates

Our intern architect, Daren Blair, has recently completed all the requirements to become a Registered Architect. Daren had his final interview on November 6 and passed with flying colours. He was officially granted registered status on December 1—this includes his own architectural stamp and all the rights and privileges that come with being fully registered. Congratulations, Daren! We are very proud of your accomplishments.

Project Updates: Recent Project Completions

We have recently completed a number of commercial projects. Here are photos of three projects completed in November:

Budget Car and Truck Rental, Red Deer, Renovation

Princess Auto, Red Deer, New Construction

Princess Auto, Medicine Hat, New Construction

Here's the "after" photo of our "Mo Bros". All of the "Mo Sistas" (the women in their lives) were unanimous in hating the mustaches, but it was all for a great cause! Thanks so much to our participants and to everyone who donated to our team. We raised \$880 for men's health issues.

"Green" News

George Berry recently attended the U.S. Green Building Council Conference in New Orleans, LA. This was an intensive four day conference devoted exclusively to innovative, sustainable building practices. Some sessions George attended included Water Conservation, Profitability of Green Projects, Integrative Design Processes, and the Value of Healthy Buildings. We hope to apply this new information to our own projects here at home. George and Susanne Widdecke are members of the Canada Green Building Council.
