## Berry Architecture Welcomes Two New Architects

We are very pleased to announce the addition of two graduate architects to our staff at Berry Architecture—Carlos Gamez and Ileana Gonzalez.

Carlos has 9 years of experience in the field of architecture which includes working as a project manager for Puebla Arquitectos and as a freelance project architect in Hermosillo, Mexico. Carlos has also taught Architectural Design, Interior Design, and Graphic Design at the university level for 8 years.

Ileana has 8 years of architectural experience and has worked as a project architect and project coordinator in Hermosillo and San Carlos, Mexico. She has excellent experience in energy efficient/environmental architecture and has worked for the University of Sonora's Architecture and Design Department conducting bio-climatic research.

We are excited to have these two talented and experienced designers as part of our team. Welcome Ileana and Carlos!

On January 10 -11, Berry Architecture hosted a Canadian Red Cross Standard First Aid and CPR course in our office space. Susanne Widdecke and Angela Flinn completed the course and are now the Certified First Aid responders for our workplace. The course provides a three year certification.

Breanna Spence has recently completed an introductory course on Principles of Construction Documentation for Construction Specifications Canada. This 10 week course enables students to have a better understanding of construction documentation (specifications, drawings, and schedules), products, bidding procedures, and contracts. It is also a prerequisite for all other CSC education courses. Thanks for your commitment to continuing education, Breanna. Congratulations!

## Staff News Corner

Angela Flinn recently completed a 12 week course through Construction Specifications Canada. This advanced level course in Construction Contract Administration focused on gaining an in-depth understanding of construction processes and documentation, administration and enforcement of contract requirements, and how to deal with challenging situations. We are very proud of Angela's dedication to constantly improving her skills. Way to go, Angela!
