

Spring Has Arrived On Our Roof, March 2015

## ASCHA Tradeshow—April 15-16, 2015

The **Alberta Senior Citizens' Housing Association** Convention and Tradeshow is coming up soon, and we are excited to unveil our new double booth (90-03/90-04). Berry Architecture joined ASCHA in June of 2003 and started attending the tradeshow that same year.

This year, we've done a complete overhaul of the booth—we'll have our community tent at the show, complete with comfy furnishings. There'll be games, prizes, and information. Stop by and visit George, Susanne, Angela, and Bonita. We are eager to share our knowledge of trends, lifestyles, and housing needs for seniors—ranging from fully independent apartment-style living to complete care dementia facility requirements. We look forward to seeing you there!

George

Susanne

Angela

## 7th Annual Berry Architecture Wellness Ride—August 15, 2015

We have started planning with the Canadian Mental Health Association and Central Alberta Brain Injury Society for this year's Wellness Ride. The ride will include a 25, 50, and 100 km distance again this year. As always, all proceeds remain in Central Alberta and go directly to CMHA and CABIS. We are looking for corporate sponsors to kick off this fundraising event and offset some of the initial costs. If you or your company would like to donate, contact Bonita at [bonitar@berryarchitecture.ca](mailto:bonitar@berryarchitecture.ca) or go to [www.wellnessride.ca](http://www.wellnessride.ca). Thanks for your support!

## Project Completion—Co-op Liquor Store, Wainwright, Alberta

The Co-op Liquor Store in Wainwright opened in January, 2015. The store is a 4,720 sq ft stand alone building located in an existing Co-op complex. The complex includes a grocery store, gas bar, and convenience store. This liquor store completes the range of services provided in the complex. The "Grand Opening" will take place this summer.

## Staff News Corner

All staff of Berry Architecture took part in a full day of professional development and team building with Linda and Jim Wilson of CorQuest, Inc. on March 10. It had been a few years since we had used the DiSC profile assessment tool, and it was time to update our profiles so we can work effectively with our current team. "DiSC" is a personal assessment tool used to improve productivity, teamwork, and communication. The model provides a common language that people can use to better understand themselves and others and to adapt their behavior when working with others. It is especially useful in a workplace environment. It was really helpful for us to understand the dynamics of the work styles of our group of new and long-term team members. We enjoy each other's company, so our team building day was fun too!

Berry Architecture Team, 2014
