

PRIME CONNECTION

New Project: Alberta Parks Building

Berry Architecture is beginning a new project with Alberta Environment and Parks. The project is a new concession building at Miquelon Lake Provincial Park. The 1300 hectare park is located 65 km southeast of Edmonton in the dry mixed-wood sub-region of the Boreal Forest Natural Region, at the south end of the Cooking Lake Moraine (a.k.a. the Beaver Hills). We are designing a concession building for the park of approximately 111.5 m² which will comprise a kitchen with hot and cold food concession, sales counter, millwork for storage, and open areas for dry storage and stand up coolers. The exterior will be designed to complement the existing parks buildings. We are pleased to be undertaking another project for Alberta Parks!

Project Update: Westpark Middle School

A lot has happened on the Westpark Middle School project since our last project update in June! Here's an overview of what we've been up to over the summer months:

- we designed the site plan layout and floor plans which are soon to be signed off;
- we are currently designing exterior building elevations;
- we have officially registered the project for LEED[®] certification under the LEED[®] program;
- we are working with our consultant team to define the systems in the new building;
- we are continuing to research innovative ideas for incorporation in the new school;
- we are working on final completion of the design report required by Alberta Infrastructure;
- we are continuing to meet with the design committee and sub-committees;
- we will be meeting with the student design committee during their flexible periods this fall.

The project is progressing well; we'll be sharing floor plans and elevations very soon.

New Project: Saddle Lake Health Care Centre

Berry Architecture has just been awarded another health care centre expansion and renovation project. This project for Saddle Lake First Nation will include a renovation/repurposing of their 1985 health care centre with complete systems upgrades and interior and exterior refurbishment as well as an expansion to accommodate their needs for increased health programming. The facility is a multi-purpose health centre delivering primary health care and community health services to the Nation's on-reserve population. This is the fifth community health centre that Berry Architecture has undertaken for Alberta First Nation communities, and we are excited to have the project underway.

STAFF NEWS CORNER

Carlos Gamez completed the Fall Protection course offered by Arresting You Ltd. on August 15 and is now certified to perform reviews such as roofing reviews and other reviews requiring work at restricted heights.

WELCOME FALL STUDENT

Andrea Brassard joined us on September 6 as our new student worker. She will be with us for the next two months assisting Breanna with a large project for RDPSSD. Andrea graduated from LTCHS in June. Welcome to the team, Andrea!

NAME THAT ARCHITECT

The first person to correctly identify the architect(s) of the featured building receives a gift card. [Respond here with your answer.](#)

Congratulations to Trevor Baragar for correctly identifying Moshe Safdie as last month's featured architect. Project: Habitat 67, Montreal, QC.
