Educational Projects Issue: Wetaskiwin Regional Public Schools

Berry Architecture has a large number of educational projects on the go currently, and we'd like to highlight some of these very important projects. The education and inspiration of our children and young people is crucial to the well-being of our communities and our province; furthering this cause in any way that we can is an important mission for our firm.

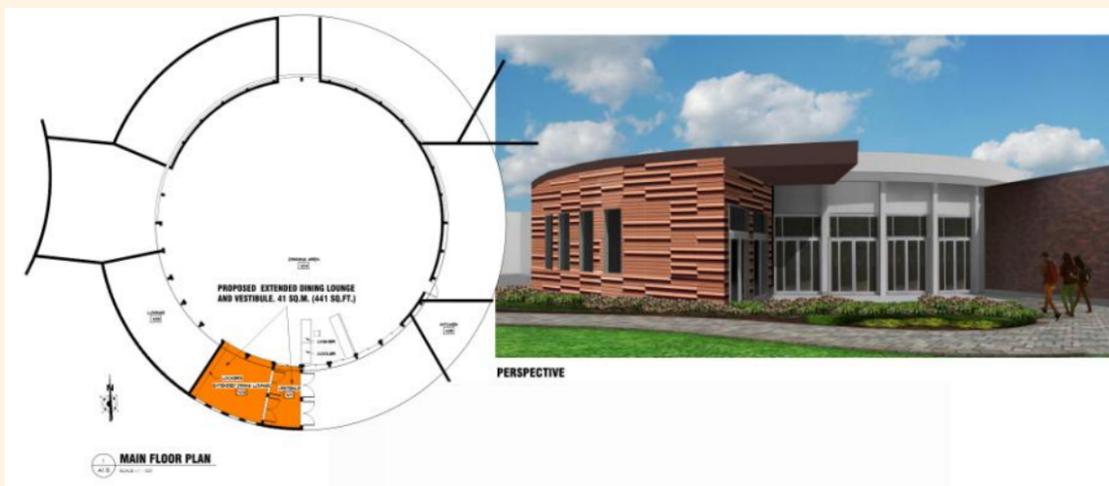

In 2016, we began an ongoing contract with Wetaskiwin Regional Public Schools to provide architectural services for their region. We have undertaken several projects for the division, including the addition of four modulars and a vestibule to Griffiths-Scott Middle School in Millet and renovations to three schools in Wetaskiwin. We are also adding smudging rooms to several schools to provide spiritual and cultural connections for First Nations students and families throughout the region. In addition, we will be providing services to organize and maintain existing facility drawings and specs as well as facility reviews and data sheets. There is a lot going on in the Wetaskiwin region, and many area schools are ready for some exciting renovation and modernization projects.

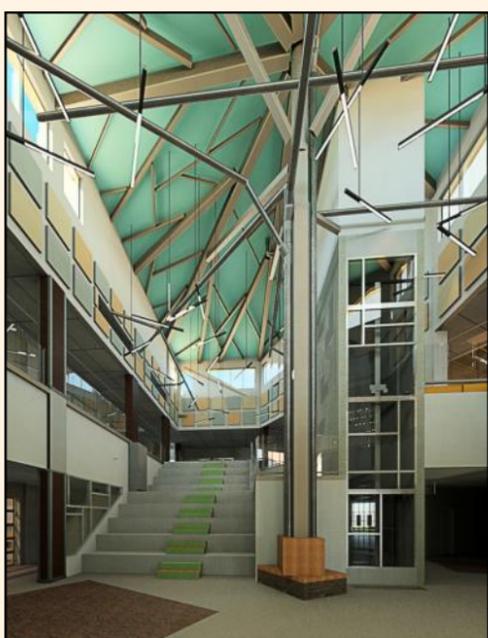

Griffiths-Scott Middle School, Millet, AB

Olds College

We have recently undertaken a number of renovation projects at Olds College, and we are very pleased to be establishing an ongoing relationship with the College. Projects include: Metals Building Renovation, Frank Grisdale Dining Hall - Skydome Replacement and Vestibule Addition, South Arena Seating Design Options, LINC Classroom Renovation, and Wetlands Amphitheatre Replacement.

Westpark Middle School + RDPSD Projects

The new Westpark Middle School project continues to progress. All drawings and specifications are complete, contractors are shortlisted to five, and we are waiting for provincial approval to put the project out for tender. Here's a conceptual rendering of the central core.

Other upcoming and current projects for Red Deer Public School Division include modernizations and renovations, building envelope upgrades, building systems upgrades, and ongoing facility reviews and data sheets for all RDPSD buildings.

STAFF NEWS CORNER

Join us at ASCHA—we're at the ASCHA Convention & Tradeshow this month, March 22-24. We hope to see our seniors' housing clients and contacts there!

COR Audit—2016

Our Certificate of Recognition Audit was completed in January, and we received a score of 99%! COR is a safety program designed for the construction industry, and Berry Architecture is one of only a handful of Alberta architecture firms to be COR certified. We are very proud of our commitment to safety in our office and on our projects.

NAME THAT ARCHITECT

The first person to correctly identify the architects of the featured building (tower portion only) receives a gift card. [Respond here with your answer.](#)

Congratulations to Campbell Chow for correctly identifying Norman Foster and Ken Shuttleworth as the architects of last month's featured building. Project: 30 St. Mary Axe, London, UK.
