New Project - Collegiate Sports Medicine at RDC

We are currently working on a new project for Collegiate Sports Medicine—interior space planning, interior design, and full working drawings for their new outlet in the Gary W. Harris Canada Games Centre at Red Deer College. The 2600 ft² space offers 12 treatment beds for physiotherapy and massage therapy (in both private and open spaces), a workout area, and a private room for concussion testing. The new location also includes a staff room, offices, washrooms, reception, and retail space. Collegiate Sports Medicine is excited to be expanding to their third location in Red Deer.

Project News—Alberta Health Services Projects

Berry Architecture has recently expanded our scope of projects in the field of health care/medical facilities. Previous and ongoing projects have included a number of health care centres undertaken with Health Canada; however, in the last few years, we have also completed many projects for Alberta Health Services. These span a full gamut from small interior and exterior renovations of hospitals and health centres to the complete replacement of the Medicine Hat Regional Hospital roof. We are currently working on the relocation of the Addictions and Mental Health Treatment Centre in Wainwright, as well as renovations to the Boyle Healthcare Centre and Rosehaven Care Centre in Camrose.

Welcome New Staff Member - Cody Lyzenga

We are so pleased to announce that Intermediate Architectural Technologist, Cody Lyzenga, joined our team on February 5th. Cody is a graduate of NAIT and has worked in the field for the past four years. Cody has an excellent grounding in Revit and other drafting software and is a very valuable asset to our production team. The office is quite busy right now with a large volume of both large and small projects, so Cody's ability to jump right into production has been an important benefit to the team. Welcome Cody!

Cody Lyzenga

STAFF NEWS CORNER

Work Experience Students:

As part of their practicum experience, we have had three Architectural Technology students in our office this month: two students from NAIT the week of February 12-16 and a student from SAIT the week of February 20-23. Berry Architecture has taken part in this program for many years. It's good experience for the students and an opportunity for us to keep up with what's going on in the education of new architectural technologists in Alberta. Thanks to Toni, Brittany, and Carlle for joining us for your work weeks!

Green News:

George Berry will be attending the GLOBE Forum 2018 Leadership Summit for Sustainable Business in Vancouver, March 14-16. This is the premier conference for sustainable businesses in Canada. George has attended in the past and found it to be on the cutting edge of new technology, policy, and thought in the field.

NAME THAT ARCHITECTURAL ELEMENT

Congratulations to Dale Watson who correctly identified last month's architectural element as flying buttresses.

Please email responses to office@berryarchitecture.ca. The person with the first correct response receives a gift card.
