New Office Opens in Cranbrook!

Beginning in July, our office in Cranbrook is now staffed part-time with George, Isaac, and Jason. Initially, George and Isaac will be staffing the office on a rotating basis, with Jason helping out as needed. Typically, we will be in the East Kootenay area Mondays through Thursdays. The address is 131-7th Avenue South, Cranbrook, BC. We are located in a really cool co-working space called "Ground Floor." You can contact us on our BC number at 250.421.3555 or by email at cranbrook@berryarchitecture.ca. Give us a call to look after all your BC project needs!

Staff News: It's Official!

Carlos Gamez Ruiz can now call himself a "Registered Architect" and has his own architectural stamp! He joins George Berry and Isaac Martinez to complete our team of Registered Architects.

L-R: Isaac, George, and Carlos

Chili Cook-Off Fundraiser

Berry Architecture took part in the Chili Cook-Off Fundraiser for the first time this year. This event, put on by Big 105/The Drive, is in support of The Kidney Foundation and is a great community event during Westerner Days. The venue had to be moved inside but was definitely a success in spite of the weather. Our theme was "Caribbean Cowboys," with a delicious mango chicken chili. Our team of six worked very hard on the event and did a great job! Thanks so much to Angela Flinn, Tammy Dowding, Tracy Wells, Caitlin Wilson, Tracey Evans, and Jenna Ackerman.

Our team: L-R Tammy, Angela, Caitlin, Tracey E., Tracy W.

Wellness Ride Reminder

Don't forget the upcoming Berry Architecture Community Wellness Ride, August 10, 2019. The ride supports the Canadian Mental Health Association and Central Alberta Brain Injury Society. To register to ride, be a corporate sponsor, or make a donation, go to www.wellnessride.ca. Hope to see you there!

Green Roof Tours

We had several groups here for green roof tours in June. This included a grade one and two class, a high school group, and a garden club, plus some private tours. Since our first year of planting in 2012, the green roof has flourished into a beautiful, blooming space that is home to a variety of insects and birds! We are especially pleased to see so many pollinators—they are so vital to maintaining our ecosystem.
