## Our Current Residential Projects

Berry Architecture has several residential projects on the go at this time—both multi-unit and single-family. Multi-unit projects include two five-plexes in Radium, a multi-family development in Kimberley, a seniors' apartment in Invermere, an apartment in Sparwood, and a six-plex in Invermere. Single family homes include a single-family development in Invermere and individual homes in BC, Alberta, and New Brunswick!

With all our projects, we offer a focus on sustainability, custom design, and constructability. We encourage our clients to consider sustainable design, and our goal is to meet or exceed Step Code requirements whenever possible. We have the ability to offer sustainable features, such as Passive House, Net Zero, Rammed Earth, Straw Bale—or just simply a more energy-efficient home.

Five-plex, Radium, BC

Off the Grid Home, Miramichi, NB

## World Green Roof Day, June 6!

June 6 was World Green Roof Day! In honour of this event, we hosted tours on our green roof. Horticulturist Cynthia Pohl, from Living Lands Landscape, guided the tours. As you may recall, Berry Architecture won an International Green Roof Award of Excellence from Cities Alive in 2015. The judges were particularly impressed with our working stream and fountain. The roof gets more beautiful and productive every year!

## Spirit River Lodge Sod-turning Event

The sod-turning event for Spirit River Lodge took place on June 3, 2022 in Spirit River, Alberta. Our Construction Administrator, Raymond Rogers, attended on behalf of Berry Architecture. The new lodge will provide 92 homes, made up of 40 lodge suites and 52 Designated Supportive Living suites. We are partnering with Krawford Construction and the Grande Spirit Foundation on the project. On the shovels were Josephine Pon, Minister of Seniors and Housing, and Judy Kokotilo-Bekkerus, Board Member from the Foundation. It is exciting to have this new lodge officially underway!
