July on the Roof

### Berry Architecture Sponsors Soap Box Derby Car

Delburne School held a soap box derby car race on June 12. This was a really cool project for the school that featured input from multiple grades—Grade 8's were in charge of the design and construction of the cars, and Grade 7's were involved with business planning and marketing. Race day was a great success, and the school will be implementing the project as an ongoing program. Berry Architecture sponsored a car designed by a talented Grade 8 design team. It had great structural integrity, and survived all four races intact—many cars did not fare so well! Great job design team!

### Staff News Corner

#### Staff Development Day on the CorQuest Ropes Course

On June 5, all staff of Berry Architecture took part in a team-building day with CorQuest training on their ropes course at beautiful Sylvan Lake. This was an intensive training day which challenged us to work together as a team to overcome a number of scenarios with activities both on the ground and on the high ropes course. It was an informative and interesting experience which helped us to improve our skills in areas such as communicating, listening, planning, recognizing and working well with our different personality types, and challenging ourselves mentally and physically. It was also fun to get together outside the office and enjoy a beautiful day in the woods—complete with mosquito spray and sunscreen!

### Berry Architecture's Work with Correctional Services Canada

This month, we would like to feature our extensive history of work with Correctional Services Canada. We have worked on many renovation jobs large and small for Correctional facilities in Alberta and Western Canada since 1999. This includes numerous projects at Bowden Institution and Drumheller Institution, as well as projects in Maskwacis, Maple Creek, SK, and Demarcation/Fencing Reviews at multiple institutions in the Prairie Region. These projects range from administration building renovations, kitchen renovations, secure file storage, and electronic room units to muffin monsters, roof replacements, security barriers, and sally ports. We have developed great working relationships with CSC's project managers and have gained valuable insight into the challenges and specialized knowledge required for corrections work.

**Wellness Ride**

Join us for a supported ride of:

- 25 K.
- 50 K.
- or 100 K.!!!

Aug. 15, 2015

In support of:

Canadian Mental Health Association  
Central Alberta

CABIS  
Central Alberta Brain Injury Society

Registration form and ride information at:  
[www.wellnessride.ca](http://www.wellnessride.ca)

### Wellness Ride Update—August 15, 2015

The Wellness Ride is only one month away! Sign up to ride 25, 50, or 100 km at [www.wellnessride.ca](http://www.wellnessride.ca). Riders are asked to raise at least \$200 in donations. We also need volunteers to make the day run smoothly—contact Jen at [jabuulba@reddeer.cmha.ab.ca](mailto:jabuulba@reddeer.cmha.ab.ca) if you are interested in helping out. As always, all funds raised remain right here in Central Alberta and benefit the Canadian Mental Health Association and the Central Alberta Brain Injury Society.

Here's a look at the new poster for this year's ride, featuring our co-sponsor, Red Deer Primary Care Network. We are very excited to have Red Deer PCN on board this year; their enthusiasm and input have been invaluable! We are also very fortunate to have Alex Stieda back as our celebrity guest rider. He is a great resource on the ride; if you have any questions about cycling, bike maintenance, handling skills, training, etc., don't hesitate to ask Alex.
