101 Kootenay Street Renovation

This project in Cranbrook, BC was an exterior and interior renovation of a mixed-use office building which includes tenant retail spaces and co-working offices. The building received a complete facelift on the exterior as well as interior renovations and reconfigurations to tenant and co-working spaces. A unique feature is a living green wall in the lobby which provides a beautiful aesthetic element and benefits in terms of air quality, humidity, and noise reduction.

Welcome Cranbrook Summer Student

Michaela Bateman is our new summer student at the Cranbrook office. Michaela started on June 1 and is working with Cody and Carlos on projects in the East Kootenays. She has completed one year of the Architectural Technology program at the British Columbia Institute of Technology (BCIT). Welcome, Michaela!

New Project: Medium Pace Winery

This new winery and residence will be situated on the slopes of Okanagan Lake, near Summerland, BC. The winery is designed to engage views of both the landscape and the wine-making process. The main elements are the residence, a future vacation rental suite, the workshop housing the winemaking process, and the public tasting room with views to the cellar, the vines, and the lake. A minimal material palette, in concert with the massing and roofline, creates a strong architectural language, resulting in a visual design that makes a statement on the hillside site.

RVS Education Centre Renovation

Berry Architecture is pleased to be working with Rocky View Schools in Air-drie, AB. We are completing interior renovations to their Education Centre Office. Phase 1A is now complete, with the addition of two new meeting rooms and reconfiguration of the kitchenette and open flex space. Phase 1B is just getting underway and will entail renovations to the main entry and existing large meeting rooms. We're looking forward to continuing our work with RVS!
