Berry Architecture Now in Kelowna, BC!

Berry Architecture has expanded again! We now have an office in Kelowna. Registered Architect, Carlos Gamez Ruiz, has relocated to Kelowna to head up this new satellite office. We have been completing projects in the Okanagan region for the past year or so, and it was time to have a permanent presence in the area. We also have an ongoing collaborative relationship with an established architecture firm in Penticton. We have some exciting projects on the go, and there are many opportunities to produce innovative, impactful architecture in the Okanagan. We are stoked to get going! Official opening is May 1st.

Our Kelowna Address: 111 - 889
Vaughan Avenue, Ph. 250.258.8211

Staff News

In March, Architectural Technologist, Tracey Evans, completed “Principles of Construction Documents”, the first in a series of courses offered by Construction Specifications Canada (CSC). Tracey is working towards becoming a Specification Writer and will soon be taking the next course in the series. Way to go, Tracey! We are so proud of our team’s commitment to ongoing education and professional development.

Our Projects in the Okanagan

As mentioned above, we are already working on a wide variety of projects in the Okanagan. We began working in the region in 2021. Projects include a new winery and residence, an entertainment and dining venue, a food production factory, tenant retrofits for an historical building and a new salon and spa, façade renovations, a brownfield site redevelopment to an industrial park complex, interior renovations to a multi-unit residential building, a modular home production facility, and modernization of an aesthetics academy and salon.

If you are considering a new project in the Okanagan, give Carlos a call at 250.258.8211. He brings 17 years of experience in architecture and has specialized in Building Envelope, Passive House design, and sustainable architecture. The Kelowna office will be fully supported throughout design, production, and construction administration by the main office in Red Deer and the Cranbrook satellite office. Architects George Berry and Isaac Martinez will provide their expertise to all locations. We are a dedicated team and work together as one firm with 22 talented team members.
