Project Update: Another LEED Gold Project!

The Claystone Waste Administrative Building has received LEED Gold Certification! This new office in Beaver County, AB was built with a LEED Silver target, but we were able to achieve LEED Gold within the original Silver budget. This was achieved through the hard work and commitment of all parties involved—Claystone Waste, Berry Architecture, JEN COL Construction, LEX3 Engineering, Reinbold Engineering, Acuity Engineering, AL-Terra Engineering, Parkland GEO, Generate Energy, all our subtrades, and of course, Entuitive, the Energy Modelling and LEED consultant. This couldn't have been accomplished without the team effort of everyone. Thanks to all involved!

BAA Donation to CMHA, Cranbrook

L—R: Susanne Widdecke (BAA), Natalie Hake (CMHA), Joanna Heath (Purcell Golf)

Berry Architecture took part in a golfing fund-raiser on August 22nd in support of the Cranbrook chapter of the Canadian Mental Health Association. BAA matched all funds raised by the event which took place at the Kimberley Golf Course (Purcell Golf). In this new initiative, a different charity benefits from all proceeds on Monday evenings at the course. Berry Architecture contributed \$1,535 to CMHA in matching donations.

George Berry at the University of Cambridge

George is beginning a Master's degree at the University of Cambridge in the UK. The degree is a Master of Study in Inter-Disciplinary Design for the Built Environment. The program is designed for working professionals, and the two-year course requires a week-long residency on campus six times during the program. The rest of the program will be completed online. This week is George's first week in residence. He is excited to be back in school and exploring a topic he is passionate about—how we can create buildings that are Net Positive, exceeding the Net Zero goal, while remaining affordable for clients and developers.

Sunnybrook South—Latest CRU Complete!

The latest addition to the Sunnybrook South Commercial Development in Red Deer is now complete. The new Commercial Retail Unit (CRU) includes a physiotherapy clinic and three additional to-be-leased CRUs. The last unit, currently under construction, will house a two-storey dental office, plus two more CRU spaces. There will be five buildings in total that provide a wide variety of services on the Ing & McKee Insurance Office site. We have partnered with Tricon Developments on this Design-Build project.
