New Project: Beaver First Nation Admin Building

Berry Architecture is currently working on a new band administration building for Beaver First Nation in Child Lake, Alberta. The new building will house the Band Administration suite, with offices for Chief and Council members, the Band Administrator, and two boardrooms. There will be spaces for all the administration departments, intake and membership, special projects, vestibule/lobby, reception, staff kitchen, and various storage and file rooms. We also have areas throughout the building for display of culturally significant art and artifacts, plus a large outdoor courtyard that will provide space for cultural and community gatherings. Currently, the project is at the design development stage and is moving into the construction documentation phase.

A New Intern Architect!

Jherlyn Esguerra is our latest team member to be registered as an Intern Architect in Alberta. Jherlyn has a Bachelor of Architecture degree from the Philippines and has completed the requirements to be registered with the Alberta Association of Architects (AAA). She is now working on fulfilling her educational hours through the internship program. Congratulations, Jherlyn!

On-going Multi-family Housing Projects

Berry Architecture has been working on a number of multi-family projects in the Central Interior Region of BC. As the 2023 spring construction season nears, watch for these projects popping up, including the rental units pictured here. Each project is an opportunity to support those needing affordable housing in the Columbia Valley, including families and seasonal and essential workers. These developments also support the local economy by providing employment, as well as attainable accommodations.

Project Completion: Apex Accounting Office

This project was an office expansion and renovation in Creston, BC. Apex Accounting had outgrown their space and needed to expand into the neighbouring CRU. The construction was phased; the new CRU was renovated first, then the client moved into it while the original space was being renovated. The new office is comprised of a welcoming reception and waiting area, 14 private offices, large meeting room, small meeting room, print room, staff kitchen and lounge, updated washrooms, and storage space. We also provided functional programming, space planning, and interior finish selections.
